Michael Friedman, Lead Dep. Commissioner  
Food & Drug Administration  
Fisher's Lane, Room 1471  
Rockville, MD 20857

Dear Mr. Friedman:

There must be mandatory safety tests for, and labeling of, transgenic foods! It is unconscionable, and violates the trust of the American people in their government, that food articles which have been bio-engineered are allowed on the market without being labeled as such!

Please take action quickly to stop this dangerous practice.

Sincerely,

Anne S. Watson
